

# Plant and Animal Cells

Complete the crossword puzzle using what you know about the subject. Refer to the word bank if you need help.

## Word Bank

vacuole  
mitochondrion  
cell membrane  
golgi  
nucleus  
nucleolus  
cell wall  
lysosome  
ribosome  
chloroplast

## Across

- Stores nutrients and is generally much larger in plant cells than in animals<sup>2</sup>
- Processes and packages proteins and lipids in the cell
- Provides the energy for the cell to move
- Within the nucleus and produces ribosomes
- Contains the enzymes necessary for digestion within the cell
- Provides rigidity for the plant cell and is not found in animal cells

## Down

- Directs and controls all the other parts of the cell
- The covering of the animal cell
- Produces proteins and amino acids
- Contains chlorophyll
